

Empathy Map

Date: 15 March 2024

Team ID: SWTID-2026-8065

Project Name: Implement Client Script & UI Policy (Incident)

SAYS - Incident records need complete and accurate data. - High-impact incidents need additional controls. - Incorrect or incomplete entries should be prevented.	THINKS - Manual checks may lead to inconsistent data. - Required fields should be enforced automatically. - The form should guide users during incident entry.
DOES - Creates and updates Incident records. - Changes Impact and enters Assigned To. - Attempts to save records and edit State from lists.	FEELS - Concerned when required information is missing. - More confident when the form validates entries. - Reassured when incorrect submissions are blocked.

PERSONA: ServiceNow Incident User / Support Agent
